(H) Twodee (1/7) [20 points]

Spoken language is one-dimensional — the words of a sentence are pronounced in some order. Standard writing systems merely record that order. But spoken language is often ambiguous. Written language might be clearer if we used Twodee, a two-dimensional writing system that places words on the cells of a rectangular grid. Here are all the ways to write “Frogs eat flies” in Twodee:

Why so many layout options? If a sentence or other phrase consists of two sub-phrases A and B, where A is *spoken first*, then Twodee lets you *write* A either to the *left* of B (as in ordinary writing) or *above* B. If A or B has multiple words, then it will have sub-phrases of its own. The diagrams below reveal how the four Twodee sentences above were put together.

Clear writers of Twodee usually try to choose layout options that will help their readers identify the sub-phrases A and B. Make sure you align the top edges as shown when placing the A and B rectangles side-by-side, or align the left edges as shown when stacking the A and B rectangles top-to-bottom. No extra space (blank columns or rows) is allowed between the two rectangles.

To write Twodee, you do need to know how to divide the phrase you’re writing into sub-phrases. That is mostly a matter of common sense, based on the intended meaning of the phrase. There are also some conventions, such as the traditional division of a sentence into subject (“Frogs”) and predicate (“eat flies,” which describes what frogs do).

While Twodee is intended as a better writing system, it can still be ambiguous. For example, the meaning of

is not clear because the sentence could have been constructed in at least two plausible ways:

(Spoken order: “The leaves fall each year.”)

(Spoken order: “The fall leaves each year.”)

(H) Twodee (2/7)

HI. For each Twodee sentence (on the left), use the circles to enter the numbers of all its possible meanings (paraphrased on the right). Some circles may be left blank. **Hint:** You may find it helpful to identify the sub-phrases of a Twodee sentence by drawing boxes as above.

A.

Jack	and	Jill		
		TM		
went	up	the	hill.	

1. The trademarked group known as "Jack and Jill" ascended the hill.

Jack	and	Jill		
TM				
went	up	the	hill.	

2. Jack ascended the hill with his trademarked companion, "Jill."

Jack	and	Jill	TM	went	up	the	hill.	
------	-----	------	----	------	----	-----	-------	--

B.

The	citizens			
hugged	the			
and	soldiers.			
cheered				

3. The citizens hugged the soldiers and cheered the soldiers.

The	citizens			
hugged				
and				
cheered	the			
	soldiers.			

4. The citizens hugged each other and cheered the soldiers.

5. The citizens hugged the soldiers and cheered.

H2. In April 2012, an entertainment reporter wrote:

“Zoey Deschanel left her husband Death Cab for Cutie frontman Ben Gibbard.”

The former husband, Ben Gibbard, was the frontman for a band called “Death Cab for Cutie.” However, an editor for ABC News incorrectly clarified the sentence and published the following:

“Deschanel filed for divorce from husband Death Cab, throwing him over for Cutie frontman Ben Gibbard.”

(The editor went on to add that “Deschanel and Cab were married for a little more than three years.”)

By using Twodee, how could the reporter have written the original sentence to avoid this confusion? Place the words of the original sentence in 12 different cells of this two-dimensional grid (starting with “Zoey” at the top left).

Zoey								

(H) Twodee (7/7)

H3. Recall that multiple Twodee layouts were possible for “Frogs eat flies.” Here is a completely horizontal Twodee sentence:

A	computer	can	count	things	if	told	how.
---	----------	-----	-------	--------	----	------	------

An editor is considering alternative arrangements of the words that might make the intended meaning more apparent. *How many ways* can this sentence be written in Twodee? Consider only ways that preserve the intended division into phrases and sub-phrases, for instance:

Answer: _____

H4. Here are some Twodee sentences whose spoken order is not obvious, as in the “leaves fall”/“fall leaves” example. In each case, how many different spoken orders are possible? (We have just used letters to stand for the words, since the particular words don’t affect the answer.)

A. _____

B. _____

C. _____

D. _____
