

AT&T Bell Labs, Murray Hill, NJ Artificial Intelligence Research Department	summers 1989–1992
Microsoft Corporation, Seattle, WA Programmer	summer 1988
IBM Research Center, Yorktown Heights, NY Consultant	1987–1988

PROFESSIONAL
ACTIVITIES

Associate editor, *Journal of Artificial Intelligence Research* (2012–2015).

Action editor, *Transactions of the Association for Computational Linguistics* (2012–2014).

Editorial board member, “Language and Computation” corner, *Journal of Logic and Computation* (2011–).

President, ACL SIGMORPHON (Computational Morphology and Phonology) (2001–); executive committee (1998–).

Graduate program chair, CS Department, Johns Hopkins University (2002–).

Problems committee, North American Computational Linguistics Olympiad (2006–).

Guest editorial board member, special issue on Statistical Learning of Natural Language Structured Input and Output, *Journal of Natural Language Engineering* (2011).

Editorial board member, *Research in Language and Computation* (2006–2010).

Program chair, [EMNLP-CoNLL](#) (2007).

Program chair, [SIGMORPHON Workshop](#) (2008, with Jeff Heinz); SIGPHON Workshop on Finite-State Phonology (2000).

Chair of Best Paper Award committee, EMNLP (2010).

Program area chair or co-chair for NAACL-HLT (2012, morphology/phonology; 2006, syntax/grammar/morphology), EMNLP (2009, phonology/morphology/tagging/chunking/segmentation; 2006, machine learning), EACL (2006, phonology/morphology/finite-state/tagging/segmentation).

Publications chair, ACL (2005).

Co-chair for HLT/NAACL Tutorial and Workshop Programs (2003).

Invited panelist, ACL Workshop on Multiword Expressions (2011).

Advisory committee, ACL SIGDAT (Linguistic Data and Corpus-Based Approaches to NLP) (2007–).

Advisory committee member, Zooniverse project of the Adler Planetarium and JHU Space Telescope Science Institute (2009–).

Advisory board member, cogito.org (2005–).

Advisory board member, AMS GAANN Fellowship Program (2009–).

Special issue editor, *Cognitive Science* (2002).

Journal reviewer, *ACM Transactions on Speech and Language Processing* (2008, 2005), *Computational Linguistics* (2011, 2010, 2007, 2005, 2004, 2002, 2001, 2000), *Cognition* (2002), *IEEE Transactions on Audio, Speech, and Language Processing* (2007), *J. Algorithms* (1997), *J. Logic and Computation* (2011), *Language and Speech* (1999), *Phonology* (2008), *Research on Language and Computation* (2008, 2007).

Program committee for ACL (2012, 2011, 2010, 2009, 2007, 2005, 2004, 2003, 2002), COLING (2012, 2008), EACL (2012, 2006, 2003, 1999), EMNLP (2012, 2011, 2010, 2009, 2008, 2007, 2006, 2003, 2002), FSMNLP (2005, 2001), ICGI (2012), ICML (2004), IJCAI (2007), IWPT (2009), MITWPL (1999), NAACL (2012, 2010, 2009, 2006), NLP-LING (2010), SIGMORPHON (2012, 2010, 2008, 2006, 2004, 2002, 2000, 1998), TeachCL/TNLP (2008, 2005, 2002), Formal Approaches to Slavic Linguistics 8 (1999), International Conference on Dependency Linguistics (2011), ACL Workshop on Unsupervised Learning (2011); reviewer for AISTATS (2010), ICFP (2008), NIPS (2011, 2010, 2007).

One of the “best reviewer” awards for EMNLP (2010).

NSF panel or *ad hoc* reviewer (2010, 2009, 2008, 2004, 2003).

Board of reviewers, *Handbook of Natural Language Processing* (2008–2009).

Advisor to DARPA seedling in Adaptive Interactive Representations (2008–2009).

Member, EU/NSF joint working group: “ePhilology: Emerging Language Technologies and the Rediscovery of the Past” (2002).

FELLOWSHIPS AND AWARDS

Finalist for best paper award (ACL, EMNLP-CoNLL, ACL, EMNLP)	2009, 2007, 2005, 2002
Robert B. Pond, Sr. Excellence in Teaching Award Johns Hopkins University, Whiting School of Engineering	2005
NSF Graduate Research Fellowship (computer science)	1993–1996
Herchel Smith Harvard Scholarship (mathematics)	1991–1993
Fulbright Scholarship (creative writing), South Africa	1990–1991
Harvard National Scholarship	1986–1990

GRANTS	James S. McDonnell Foundation (Scholar Award in Complex Systems): A Declarative Language for Specifying Models, Data, and Computations (PI, \$450K) <i>[submitted 2012]</i>	exp. 2012–2016
	NSF IGERT: Very Large-scale Multilingual Human Language Technology: Empirical, Analytical and Computational Foundations (PI, \$3.5M, leading a group of ≈ 25 faculty) <i>[submitted 2011, declined]</i>	exp. 2012–2017
	NSF RI-Medium: Learned Dynamic Prioritization (PI, \$900K)	2010–2013
	JHU Framework for the Future: Initiative in Computational Learning (PI, \$50K, leading a group of 30+ faculty)	2009–
	NSF: Computing Innovation Fellows Program (postdoc mentor, \$140K)	2009–2011
	NSF RI: Cross-Cutting Research Workshops in Intelligent Information Systems (co-PI, \$647K plus substantial additional funding from other agencies and corporations)	2007–2010
	JHU WSE-APL Partnership Fund: Learning with Less (PI, \$68K)	2006–2007
	NSF PIRE: Investigation of Meaning Representations in Language Understanding for Machine Translation Systems (co-PI, \$2.5M)	2005–2010
	NSF CAREER: Finite-State Machine Learning on Strings and Sequences (PI, \$500K)	2004–2010
	NSF ITR: Weighted Dynamic Programming for Statistical Natural Language Processing (PI, \$425K)	2003–2007
	ONR MURI: Improving Statistical Translation Models Via Text Analyzers Trained From Parallel Corpora (co-PI, \$4.3M)	2001–2006
	NSF ITR/IM+PE+SY: Summer Workshops on Human Language Technology (co-PI, \$2.35M)	2001–2006

PUBLICATIONS AND PRESENTATIONS

Invited talks

Dyna: A language for propagating and combining information. Workshop on Architectures for Uncertainty in Knowledge at Scale (AUKS), February 2012.

A non-parametric Bayesian approach to inflectional morphology. JHU Applied Math & Statistics Dept., December 2011; University of Maryland, November 2011; ICML/ACL/ICSA Symposium on Machine Learning in Speech and Language Processing, June 2011; Workshop on Machine Translation and Morphologically-Rich Languages, January 2011.

Toward unsupervised web scraping. DIRE Meeting, May 2011.

A weighted deductive language for declaratively specifying (some) algorithms. University of Bielefeld, July 2010.

Using dynamic programming to help search for reorderings. University of Bielefeld, July 2010.

Variational inference over structured variables for linguistic modeling. University of Edinburgh, May 2010.

A weighted deductive language for declaratively specifying (some) algorithms. University of Edinburgh, May 2010.

Constraint interaction, probabilistic models, and approximate inference. Chicago Linguistic Society Annual Conference, April 2010.

Extending logic programming to support modern statistical AI. Datalog 2.0 Workshop, March 2010.

Weighted deduction as an abstraction level for AI. Joint conference on Statistical Relational Learning + Inductive Logic Programming + Mining and Learning with Graphs, July 2009. (keynote talk)

Joint models with missing data for semi-supervised learning. NAACL Workshop on Semi-Supervised Learning for Natural Language Processing, June 2009. (keynote talk)

Dependency parsing by belief propagation. Boulder Workshop on Dependency Parsing, June 2009; Temple University, November 2008.

Shuffling non-constituents. Second Workshop on Syntax and Structure in Statistical Translation, ACL-08: HLT, June 2008. (keynote talk)

The Dyna language. CMU and Google, May 2008; MIT, November 2006; IBM Yorktown Heights, May 2006; Microsoft Research, August 2005; University of Washington, August 2005.

Searching for optimal permutations with very large-scale neighborhoods. JHU Applied Math & Statistics Dept., November 2007.

Discovering syntactic deep structure via Bayesian statistics. U. of Maryland, May 2007.

Bootstrapping without the boot. MITRE Corporation, August 2006; IPAM Document Space Workshop, January 2006.

Parameterized finite-state machines and their training. U. of Saarland, Germany, March 2004; AT&T Research, October 2002.

Inferring transformations. Mathematics of Language Conference (MoL8), Bloomington, June 2003.

Learning natural-language grammars using a Bayesian prior. Rochester Institute of Technology, May 2000; Johns Hopkins University, February 2000; UCLA Linguistics Department, June 1999; Stanford, 1999; U. of Texas at Austin, 1999; U. of Toronto, 1999; U. of Rochester, 1999; U. of Chicago, 1999.

Doing OT in a straitjacket. Johns Hopkins Cognitive Science Dept., 2002; U. of Rochester Linguistics Dept., 2000; UCLA Linguistics Dept., 1999; Stanford Linguistics Dept., 1999; MIT Linguistics Dept., 1997.

Journal Articles

Francisco Sánchez-Vega, Jason Eisner, Laurent Younes, and Donald Geman. [Learning multivariate distributions by competitive assembly of marginals](#). *IEEE Transactions on Pattern Analysis and Machine Intelligence*, 99, 2012.

John Eng and Jason M. Eisner. [Radiology report entry with automatic phrase completion driven by language modeling](#). *Radiographics*, 24(5):1493–1501, 2004.

Jason Eisner. [Discovering syntactic deep structure via Bayesian statistics](#). *Cognitive Science*, 26(3):255–268, 2002.

Jason Eisner. [Introduction to the special section on linguistically apt statistical methods](#). *Cognitive Science*, 26(3):235–237, 2002.

Book Chapters

Jason Eisner and Nathaniel W. Filardo. [Dyna: Extending Datalog for modern AI](#). In Tim Furche, Georg Gottlob, Giovanni Grasso, Oege de Moor, and Andrew Sellers, editors, *Datalog 2.0*, Lecture Notes in Computer Science. Springer, 2011. 40 pages (longer version available as tech report).

Antti-Veikko Rosti, Eugene Matusov, Jason Smith, Necip Ayan, Jason Eisner, Damianos Karakos, Sanjeev Khudanpur, Gregor Leusch, Zhifei Li, Spyros Matsoukas, Hermann Ney, Richard Schwartz, B. Zhang, and J. Zheng. [Confusion network decoding for MT system combination](#). In *Handbook of Natural Language Processing and Machine Translation*, pages 333–361. Springer, 2011.

Jason Eisner and Noah A. Smith. [Favor short dependencies: Parsing with soft and hard constraints on dependency length](#). In Harry Bunt, Paola Merlo, and Joakim Nivre, editors, *Trends in Parsing Technology: Dependency Parsing, Domain Adaptation, and Deep Parsing*, chapter 8, pages 121–150. Springer, 2010.

Jason Eisner. [Bilexical grammars and their cubic-time parsing algorithms](#). In Harry Bunt and Anton Nijholt, editors, *Advances in Probabilistic and Other Parsing Technologies*, pages 29–62. Kluwer Academic Publishers, 2000.

Book Reviews

Jason Eisner. [Review of Optimality Theory by René Kager](#). *Computational Linguistics*, 26(2):286–290, 2000.

Ph.D. Thesis

Jason Eisner. [Smoothing a Probabilistic Lexicon via Syntactic Transformations](#). PhD thesis, University of Pennsylvania, 2001. 318 pages.

TEACHING

Department of Computer Science, Johns Hopkins University

Robert B. Pond, Sr. Excellence in Teaching Award, Whiting School of Engineering, 2005

- *Natural Language Processing* 2001–2004, 2006–
A mixed graduate-undergraduate class that teaches a synthesis of statistical models, formal grammars, and linguistic theory, with associated algorithms. It is reputed to be one of the most challenging classes in the Computer Science department, requiring both rigor and intellectual flexibility.
Faculty at several other universities have asked to use the extensive online course materials.
Enrollment: about 30.
- *Declarative Methods* 2005–
A new course for juniors, seniors, and graduate students. It surveys computational problems that tend to pop up frequently in different guises (e.g., constraint satisfaction); the specification languages used to describe instances of these problems; general toolkits for solving these instances; and the algorithms run by these toolkits.
Enrollment: about 35.
- *Seminar in Natural Language Processing* every semester
A weekly reading and discussion group, exploring important current research in natural language processing and potentially relevant material from related fields. Topics are chosen by the group; each lasts 3–4 weeks.
Attendance: 5–15.
- *Totally Random* 2004, 2005
A 4-class discussion unit about random numbers and the uses of randomness in computer science. Part of the department’s new freshman experience course.
Enrollment: 8-10.

- *Data Structures* 2003, 2004
 A sophomore-level class, the third and last in the programming sequence for majors. Covers basic data structures and algorithms, basic analysis of algorithms, and object-oriented programming style. Online "warmups" and highly interactive classes stimulated the students to come up with designs and variations. The challenging weekly assignments often used real-world data.
 Faculty at a dozen other universities have asked to use the course materials.
 Enrollment: about 50.
 - *Finite-State Methods in Natural Language Processing* 2000–2001
 A graduate class on semiring-weighted finite-state transducers. Covers theory and practice, including the theory of formal power series, the extended regular expression calculus, and a range of applications to natural language. Rigorous assignments.
 Attendance: about 20.
 - *Statistical Language Learning* 2002
 A graduate class about past and present research that has attempted to induce the structure of language from raw data such as text. Lectures are intermixed with reading and discussion of the primary literature.
 Attendance: about 10.
- Lecturer, 1st Lisbon Machine Learning School 2011
- Lectures on generative Bayesian modeling.
- Lecturer, NAACL Summer School in Human Language Technology summers 2002–
- Lectures on NLP and applied probability.
 - [Laboratory exercise](#) in competitive grammar writing.
- Speaker, TA Training Institute, Johns Hopkins University 2005–
- Large fall lectures: "Preparing for the first day in sciences and engineering."
 - Small spring workshop (some years): "Starting the semester off right in engineering and sciences."
- Department of Computer Science, University of Rochester
- *Statistical Learning of Natural Language* 2000
 - *Graduate Problem Seminar* 2000
 Boot camp for new Ph.D. students. Students learn research skills by teaming up to tackle a series of open-ended engineering problems that touch on research in the department. (I made them build systems for face orientation detection, distributed calendar management, and information retrieval.) Several written and oral presentations are required and receive extensive feedback. The class also includes career advice, familiarization with departmental resources, presentations by other faculty, and a final research project.
 Enrollment: 10.
- Department of Computer Science, University of Pennsylvania
 Graduate Teaching Award, 1995

ADVISING

Postdoctoral fellows

Veselin Stoyanov (*NSF Comp. Innovation Fellow; now at HLTCOE*) 2009–2011

Ph.D. research students

Darcey Riley (a.k.a. Halley Orshan) (<i>Dean's Fellow</i>)	2012–
Tim Vieira	2011–
Michael Paul (<i>NSF Fellow; Dean's Fellow</i>)	2010–
Adam Teichert	2010–
Matthew Gormley (<i>HLTCOE Fellow</i>)	2009–
Nicholas Andrews	2009–
Zhifei Li (co-adv.) (<i>now at Google</i>)	2008–2010
Nathaniel W. Filardo (<i>HLTCOE Fellow</i>)	2007–
Jason A. Smith	2006–2011
Omar Zaidan (<i>now at Microsoft Research</i>)	2005–2008
John Blatz (<i>now at Videology</i>)	2004–2008
Eric Goldlust (<i>Wolman Fellow; Muuss Research Award</i>)	2004–2005
<i>Hon. Mention for CRA Outstanding Undergraduate Award</i>	
Markus Dreyer (<i>Wolman Fellow; now at SDL Language Weaver</i>)	2003–2011
David A. Smith (<i>NSF Fellow; now Asst. Res. Prof., UMass</i>)	2002–2010
Roy Tromble (<i>NSDEG Fellow; now at Google</i>)	2002–2009
Noah A. Smith (<i>Hertz Foundation Fellow; now Assoc. Prof., CMU</i>)	2001–2006

H.S./B.S./M.S.E. research students

Katherine Wu	2012–
Jay Feldman (<i>Pistritto Fellow</i>)	2012–
Michael Tontchev (<i>High school—Grand Prize Winner, Baltimore Science Fair</i>)	2010–
Alex Ropson	2010–2011
Ashish Sharma	2009–2010
Wren Thornton	2008
Ian Nowland	2008–2009
Jay Van Der Wall	2007–2009
Asheesh Laroia	2006–2007
Samuel Huang (<i>Pistritto Fellow</i>)	2006–2007
Constantinos Michael	2005–2006
George Shafer	2005–2006
John Graettinger (<i>Outstanding Research Award</i>)	2005–2006
Michael Kornbluh (<i>Pistritto Fellow, Outstanding Senior Award</i>)	2004–2005
Chalaporn Hathaidharm	2002–2004

Ph.D. thesis committees (not as advisor)

Jason Smith	exp. 2013
Will Headden (Brown University)	2011
Jia Cui	2008
Mark Thober	2007
Gaja Jarosz Snover	2006
Jonathan Allen	2006
Gideon Mann	2006
Charles Schafer	2006
Myroslava Dzikovska (Univ. of Rochester)	2004
Silviu Cucerzan	2003
Radu "Hans" Florian	2002
Jun Wu	2002
Richard Wicentowski	2002
Grace Ngai	2000
